House Rural Development Council

Passed in the 2018 Session, HB769 contains recommendations from the House Rural Development Council. The bill does not include any of the provisions requested by Cancer Treatment Centers of America to further weaken the Certificate of Need (CON) program, nor does it eliminate CON in urban areas.

The bill does create a new CON exemption for micro hospitals with 2 - 7 beds located in counties with a population of 50,000 or less, but only when an existing hospital purchases a closing hospital in a contiguous county in order to repurpose the facility as a micro hospital. HB 769 also contains multiple provisions aimed at addressing the ongoing shortage of health care providers in rural Georgia. It eases restrictions on the use of remote order entry by hospital pharmacies when a pharmacist is not available to be physically present in the facility; directs the state Medicaid agency to streamline the provider credentialing and billing processes and to update its payment policies for telehealth services; and creates a new grant program for physicians who practice in underserved rural areas of the state. It also includes language that increases the rural hospital tax credit to 100% and makes S-Corps eligible donors.
